Stretch S2 — Usability test with one real person

Site: https://www.final.edu.tr · Tester: Abdalla Ali (2103060186) · Date: _____ · Device and browser: _____

Volunteer (first name only): _____ · Not a computing student? ☐ Yes · Their study or job: _____

Script — read this to the volunteer

1. "I am testing the website, not you. There are no wrong answers."
2. "Please say out loud what you are thinking and looking for."
3. "I cannot help you during the tasks. Tell me if you want to give up."

Start on the home page each time. Start a timer when you finish reading the task. Do not help.

Tasks and notes

Task	Time taken	Where did they hesitate?	Exact words they used
1. Find the opening (working) hours			
2. Find a contact number			
3. Complete the main task of the site: find the tuition fee for a bachelor's programme			

After the tasks — write the answers exactly

"What was the most frustrating moment?"

"What would you change first?"

Link to a Core finding

Which Core finding does one thing you saw support or contradict? (for example A3 slow page, B2 empty search, B6 hidden dropdown menus)
